Duración
12 Horas

Modalidad
Presencial

Learning by doing

Curso Oficial

Acerca de:

Upon completing this course, you will be able to discuss the various capabilities of the Cloud Foundry platform and the value it brings to custom software development teams.

You will also grasp the security and compliance implications of using a developer-focused platform such as Cloud Foundry. The course will help you articulate the difference between Cloud Foundry and infrastructure platforms like Kubernetes. The course will also help you understand the open-source model that governs the Cloud Foundry project.

Objetivos:

This course prepares you to make informed decisions regarding development platform selection and use in custom software organizations. It helps you understand the needs of custom software organizations from the standpoint of developers, operators, and security and compliance teams.
In addition, this course highlights the challenges of developing and operating custom software applications throughout their lifecycle, and offers a perspective on what this process can look like for teams that select the right platform.

Requisitos:

To make the most of this course, you will need:

- Little to no Cloud Foundry experience.

Material del curso:

- Documentación Oficial de This course Introduction to Cloud Foundry (LFD132x)

Perfil del docente:

- Formador Certificado por The linux Foundation
- Más de 5 años de experiencia profesional
- Más de 4 años de experiencia docente
- Profesional activo en empresas del sector IT

Metodología:

- “Learning by doing” se centra en un contexto real y concreto, buscando un aprendizaje en equipo para la resolución de problemas en el sector empresarial.
- Aulas con grupos reducidos para que el profesional adquiera la mejor atención por parte de nuestros instructores profesionales.
- El programa de estudios como partners oficiales es confeccionado por nuestro equipo de formación y revisado por las marcas de referencia en el sector.
- La impartición de las clases podrá ser realizada tanto en modalidad Presencial como Virtual.

Contenidos:

Module 1: Introduction to Cloud Foundry

Module 2: Developer Concerns

Module 3: About the Project

Final Exam(Verified Track)
